- kokurate.github.io

## SKILLS

### Tools

- **Laravel**
- **Bootstrap**
- **PHP**
- **MySQL**
- **Photoshop**
- **Burpsuite**
- **Microsoft Office**

### Additional

- **Critical Thinking**
- **Problem-Solving Skill**
- **Teamwork**
- **Fast Learner**
- **Time Management**

I am open to exploring various opportunities. I possess critical thinking skills, strong problem-solving abilities, a fast learner, and the capacity to excel both as a collaborative team member and an independent contributor.

## EXPERIENCE

**Internship at the computer center ,  
Manado State University**

Mar - Sep 2021

- Verifying student data for active, inactive, and alumni of Universitas Negeri Manado
- Editing event posters and banners as needed.
- Configuring Windows file sharing to enable seamless file and print sharing
- Installing software on computers
- Developing websites to meet specific demands.

## LATEST PROJECTS

2022

**Web-based complaint service application at the computer center,  
Manado State University**

2023

**Web-based Lecturer Promotion Application**

**Critical Thinking.** In developing websites using Scrum, I apply critical thinking to evaluate user needs, understand business goals, and design optimal solutions.

**Problem-Solving Skills.** During website development, I use my problem-solving skills to address technical challenges and complex project requirements. I usually do this in conjunction with critical thinking to get maximum results

**Teamwork.** In collaborative projects with clients, I practice effective teamwork to achieve a common goal. I communicate openly and cooperatively with clients to understand their needs in depth. I value their perspective and work to build a trusting working relationship.

# LATEST PROJECT

## Web-based complaint service application at the computer center, Manado State University

<https://puskom.unima.ac.id/apl>

I'm a Developer on Team

- Build the Front End using a template with framework css (bootstrap)
- Build the Backend with the PHP framework (Laravel)
- Here are some features based on the client's requirements

1. To make a complaint you must use the university email
2. Activity Log
3. Email Notification
4. Export reports in excel
5. Visitor Feedback include rating

## Type of the users

Visitor :

- Visitors are able to create their own complaints by registering using their university email. They can also search for existing complaints.
- Visitors can view the details of their own complaints and also the activity log.
- They will receive notifications through their registered email.
- Visitors can provide feedback on completed complaints.

Verify :

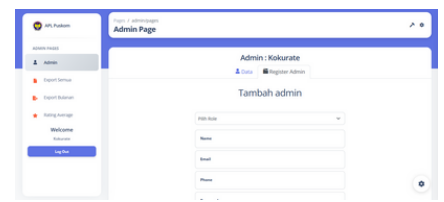

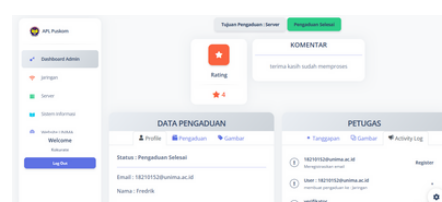

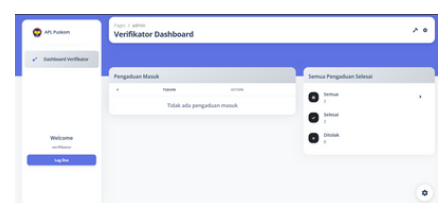

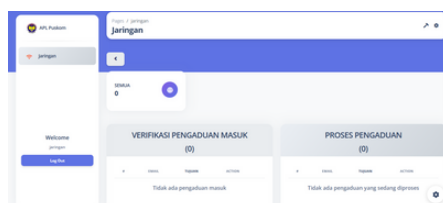

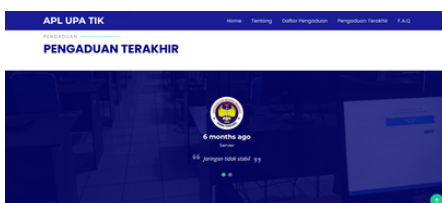

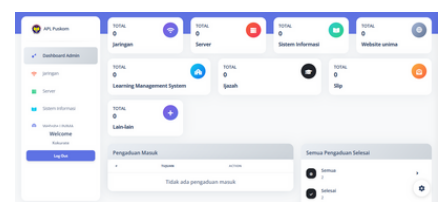

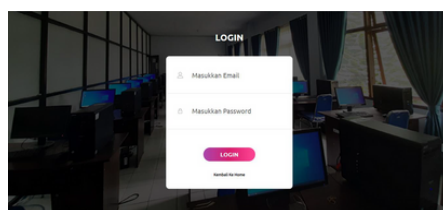

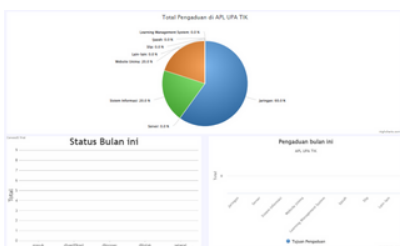

- Checks incoming complaints and forwards them to the respective officer if they are accepted. If a complaint is rejected, the team provides a reason to the visitor.

Officer :

- Officers review incoming complaints and that are currently being processed.
- They have the authority to accept, reject, or mark complaints as finished, and they must provide responses to the complaints accordingly.

Admin :

- The admin has the ability to manage user accounts.
- They can export reports in Excel format.
- The admin is responsible for overseeing all complaints and their status.

# Web-based Lecturer Promotion Application

I'm a Developer on Team

- Build the Front End using a template with framework css (bootstrap)
- Build the Backend with PHP framework (Laravel)
- Here are some features based on the client requirements
  - a.Auto merge PDF
  - b.Report in chart form
  - c.Email notification

## Type of the users

Lecturer

- Sending promotion requests to employees.
- Uploading promotion documents.
- Viewing the promotion status.
- Receiving notifications through email.
- Conducting simulations to obtain their credit number for the current semester.

Employee

- Reviewing incoming promotion requests from lecturers.
- Creating new lecturer accounts.
- Checking the submitted entries, accepting them if all documents are correct (this will automatically merge all the documents into one file), rejecting them if not, and providing the reasons for rejection along with pointing out the documents that were rejected.
- Monitoring the ongoing submission and completing it when the lecturer's promotion is approved.

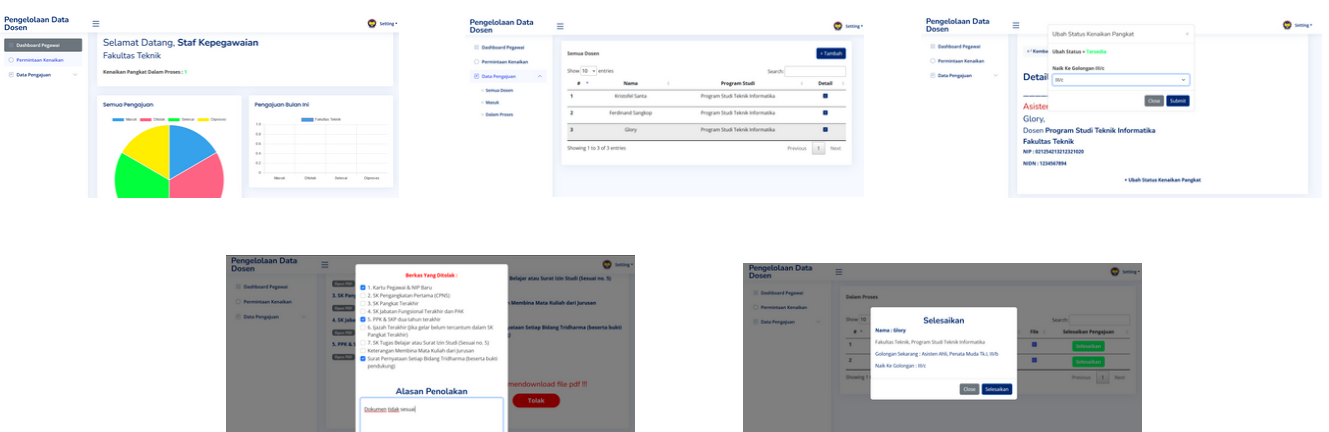

Admin

- Managing employee accounts.
- Managing the simulations.
